Outfalls/Points of Discharge After Permit Issuance (1 of 1)

Regulated Area

The Regulated Area was defined as part of the application that was used for the reissuance of the current permit. Refer to that

definition while the permittee's regulated area shall be used when completing this form.

Is the Outfall/Point of discharge within the regulated area

YES

Outfall and Point of Discharge Information

Provide the following information for each of the outfall(s) and/or point(s) of discharge within the regulated area identified, constructed, or installed after permit issuance: identification number, description of whether the discharge is from an outfall or point of discharge, and the surface water of the state that receives the discharge.

An outfall means a discharge point from an MS4 directly to surface waters of the state.

A point of discharge means a discharge from an MS4 to an MS4 owned or operated by another public body. In the case of a point of discharge, the surface water of the state is the ultimate receiving water from the final outfall.

Please note that an MS4 is not a surface water of the state. For example, an open county drain that is a surface water of the state is not an MS4.

Outfall/Point of Discharge Information

| Identification Number of Outfall/Point of Discharge | Is this an outfall or point of discharge? | Receiving Water |
|---|---|-----------------|
| CB 5 | POINT OF DISCHARGE | Grand River |
| CB 9 | POINT OF DISCHARGE | Grand River |

"Please select "I Certify" to confirm understanding and reading of the following statement: The outfall or point of discharge is within the regulated area as identified in the application.

I Certify

Please select "I Certify" to confirm understanding and reading of the following statement: The previously approved Storm Water Management Program (Part I.A.3. of the permit) includes BMPs to comply with the minimum requirements of the permit for the outfall or point of discharge.

I Certify

Please select "I Certify" to confirm understanding and reading of the following statement: The previously approved Storm Water Management Program (Part I.A.3. of the permit) is being implemented in the area served by the outfall or point of discharge, including having available an up-to-date storm sewer system map required in Part I.A.3.d.1) of the permit.
